## 01 Video2Code

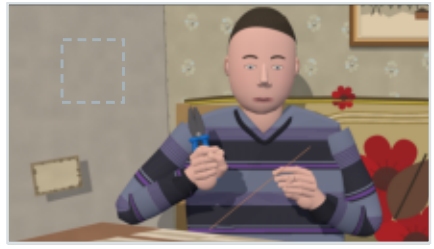

Recover the scene and its timing

Source video $V_{\text{src}}$

0.46 s 1.50 s 2.54 s

Source proxy $\mathcal{R}(P_0)$

geometry · camera · motion

## 02 Next-code prediction

Express the intervention in the program

Edit instruction

"Add a wall clock
to the left of the person."

Program changes { }

```
+ clock geometry
+ wall placement
+ hand animation(t)
```

Edited proxy $\mathcal{R}(P_1)$

Clock detail

## 03 Code2Video

Source appearance and timing

Reference encoders

- Semantic tokens
- VAE references

$c_k$

**Frozen H3**

Euler sampling · 20 steps

Continuous latent trajectory

Drop proxy

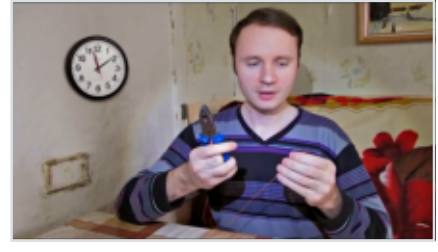

1 5 6 20

Source reference: all 20 steps

Proxy: first 5 steps
